Belikov Vsevolod

Personal Summary

UI/UX & Technical Designer with professional experience since 2006. Specialized in user interface design, design systems and technically feasible UI solutions for scalable digital products. Extensive experience in web platforms, iGaming, casual and social games.

Worked in international product teams and large companies. Strong understanding of front-end constraints (HTML and CSS), performance-oriented design and reusable UI systems. Experienced in leading small design teams and collaborating closely with developers and product managers.
